4. New Transmission Device
5. The different steel material with special coating, Which with 3 times of special hardness treatment with mirror polish by chromium plating on the machine body and and parts, To make the machine with longer product life and high performance after years.

Spec.

Model No. 号	<b>HT5C EI-48 LAMINATION STACKING MACHINE</b>
Input Power	AC110V/60 HZ or AC220V/ 50HZ
Time During	8 – 10 seconds/per unit, it depend the EI height
EI Thickness	For 0.35 ~ 0.50mm EI lamination stacking
Motor Power	100W with Gear set design
Controller Box	Programmable 3 memory with LED display
Machine Stop	Automatic stop & Manual stop – Both Available
Machine Speed	Adjustable as per EI lamination quality & bobbin design
Air Compressor	Not need the air power support.
Machine Size	650*350*450 mm
Net weight	52 kgs
Origin	Japanese Made Steel / Made in Taiwan Machine
